

Meditech International is a world leader in the development of Therapeutic Laser Systems. These are highly effective in the treatment of musculoskeletal problems, arthritis, sports injuries, wound healing and a diverse number of dermatological conditions. Meditech operates two rehabilitation centres in Toronto where up to 800 treatments are administered on a weekly basis. The knowledge and experience gained in these clinical settings over the past 20 years, is invaluable in providing appropriate clinical treatment protocols for optimal resolution of pathologies. Meditech Systems are marketed under the brand name of BioFlex.

Representatives of the company will be conducting 30-minute presentations at physiotherapy clinics in Halifax and adjacent areas during the week of March 26, 2012. For a one-on-one presentation of BioFlex Laser Therapy Systems, additional information or to schedule a short online presentation, please contact **Muneeza Khan at 1-888-557-4004 x 131.**

Company representatives will be participating at the Nova Scotia Physiotherapy AGM on March 31st, 2012. We hereby extend an invitation to physiotherapists in Nova Scotia to visit our booth and learn about this emerging, highly effective technology.

Additionally, we invite practitioners to attend one of our monthly Laser Certification Training Courses at Meditech International's head-office in Toronto. This course includes relevant formal lectures and hands-on training with Laser Therapy Systems. In order to put yourself at the forefront of this technology and enhance your knowledge-base with regard to Laser Therapy call Muneeza at 1-888-557-4004 x 131.

For training dates, special offers and additional information, please visit <http://www.bioflexlaser.com/training/> or contact Muneeza directly at 1-888-557-4004, x131 or muneeza@bioflexlaser.com.

We look forward to seeing you soon!
